			Market Metrics	Source Metrics	Grouped Campaigns	Ad ARPU by time	IAP ARPU d30 / Ads ARPU d30 Ratio	Median ARPPU by Games and Platforms	
App	OS	Country	Installs	Cost ₪	Avg. CPI	Avg. CTR	Avg. CVR	Avg. IPM	Avg. ROI_LTV
Game A	Android	United Kingdom	28,108	88.26K	3.31	14.59%	8.01%	12.12	3.77%
		Indonesia	107,438	54.58K	0.57	20.32%	4.24%	1.78	2.57%
		Philippines	58,737	32.25K	0.61	22.44%	3.82%	2.07	1.26%
		Canada	2,846	10.70K	3.61	17.60%	9.18%	15.42	5.06%
		Viet Nam	15,235	9.01K	0.56	20.96%	6.27%	2.75	0.78%
		Malaysia	5,758	3.04K	0.52	23.22%	9.32%	3.69	2.04%
	iOS	United Kingdom	59	5.30K	53.38	13.85%	0.03%	6.91	0.05%
		Canada	0	0.97K		2.58%	0.00%	5.91	0.00%
Game B	Android	United Kingdom	13,070	57.97K	4.37	2.60%	19.96%	7.08	4.77%
		Philippines	62,715	33.12K	3.46	6.02%	2.86%	0.54	0.65%
		Italy	11,562	19.77K	2.02	3.60%	6.81%	2.39	0.23%
		Brazil	23,505	18.53K	0.85	2.53%	17.97%	1.64	10.72%
		Spain	5,910	11.36K	2.08	3.47%	5.98%	2.29	2.26%
		France	3,511	6.86K	1.70	3.32%	11.78%	3.93	2.27%
		Germany	3,222	6.80K	1.66	4.41%	15.11%	7.24	3.47%
	iOS	Philippines	781	7.85K	12.84	2.06%	0.91%	0.30	1.25%

* iOS doesn't have much spending, which means it starts anew and also has few installations. Writing any comment can be biased.

* Game A has the highest CTRs in all countries, but its CVRs are similar to those of Game B.

* Since we know that the CPI in the Philippines cannot be higher than in the EU countries, there seems to be a problem with that CPI.

Game A	Android	ironSource	SL	126,189	87.51K	1.34	39.50%	0.74%	3.52	0.90%	0.01	0.01
		Unity Ads	SL	60,750	71.10K	1.32	5.98%	10.03%	7.57	3.92%	0.07	0.00
		AdWords	SL	30,672	37.90K	1.43	2.04%	5.99%	1.74	3.12%	0.03	0.01
		Facebook	SL	511	1.35K	2.61	5.23%	0.94%	1.28	0.82%	0.02	0.00
Game B	Android	AdWords	CPA	1,739	5.52K	3.26	1.34%	9.37%	2.21	11.79%	0.03	0.16
			CPI	91,406	78.94K	1.76	3.35%	6.94%	2.07	1.61%	0.00	0.01
			Level50	747	0.27K	0.56	2.44%	15.74%	1.24	1.69%	0.01	0.00
		Facebook	CPI	14,209	25.01K	3.44	0.43%	37.31%	3.95	6.29%	0.02	0.07
		Unity Ads	CPI	11,809	41.11K	4.04	3.31%	9.70%	10.69	4.72%	0.02	0.10
		ironSource	CPI	3,585	3.57K	2.87	26.29%	0.44%	3.08	0.75%	0.02	0.00

* I grouped the campaigns and breakdown with Source, OS, App. And decided to focus on only Android side.

* Game A has only one type campaign that is Store Listing. Therefore, it has much higher CTRs than the Game B.

* About Game B AdWords, we can observe that CPA campaigns have better ROI in life time than the other types of campaigns

* ironSource has the best CTR for Game B. The campaigns and their sources and the creatives that chosen for this UA network should investigate.

* Probably, There is a problem with the target audience on Facebook because the CTR are the lowest measure on the table but it's CVR is the best measure that we can observe. Also, it has a good in-app purchase ARPU it means that the acquired users by this network could be long-term.

		CPI	12,738	4.43	2.73%	20.85%	7.56	2.40%	26.34%	1.60%	5.20%	0.43%		
		Level50	36	1.03	0.83%	24.52%	1.82	0.92%	37.53%	6.67%	19.33%	0.00%		

* The 3 types of campaigns used in the United Kingdom for Game B and CVR, CTR, IPM have significant difference.

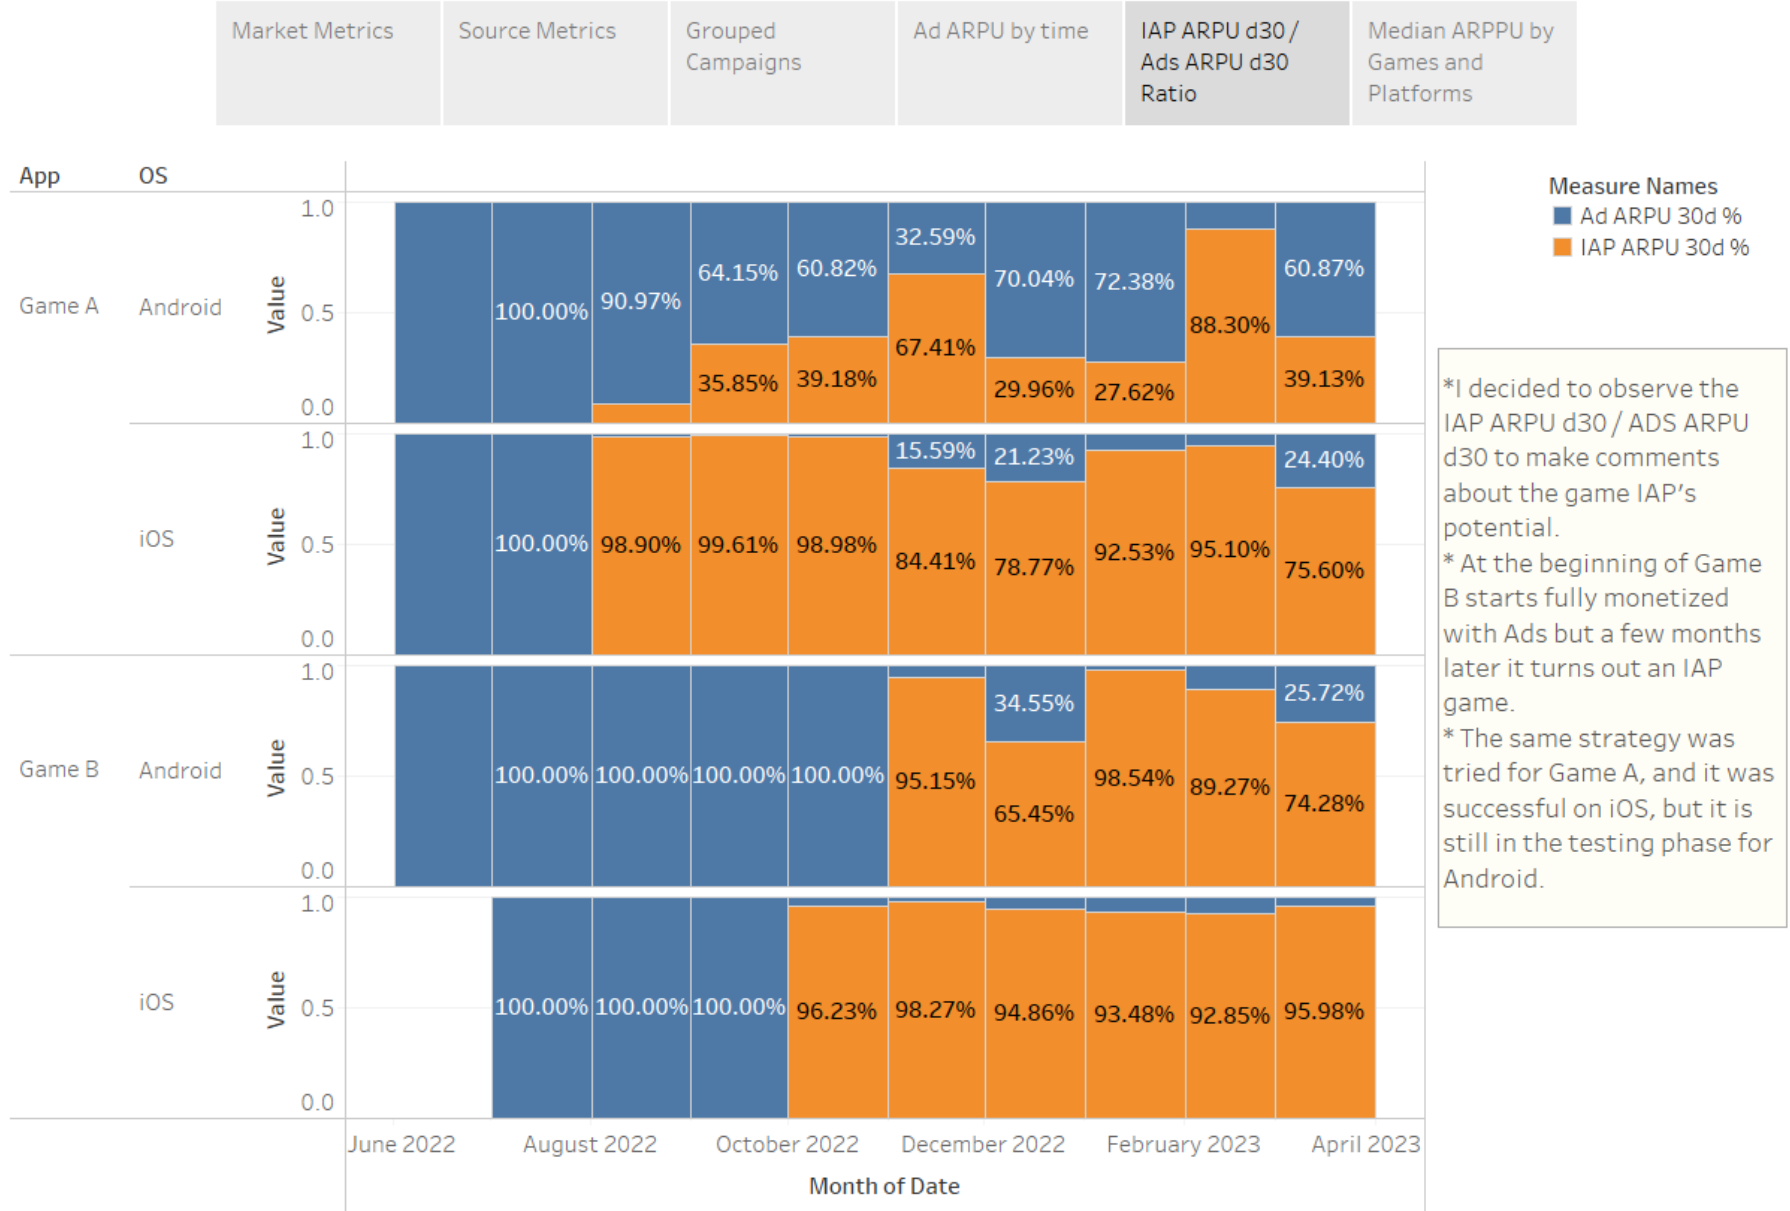

* Also, in the same country the CPA type has the biggest ROI. Even the CPI type starts with 26.34% with Level 10 Completed Ratio 1d, the CPA type beats it on Level 100 Completed LTV Ratio because of the user types. This could be mean better retention, better ARPU, etc.

*If we take a look at ARPPUs, we can obviously see that both game in iOS platform has much higher potential to sell bigger package than the Android platform.

* Furthermore, in Game A, users exhibit a higher inclination towards purchasing smaller packages priced around \$2. In contrast, Game B demonstrates the potential to successfully market larger packages, possibly in the medium price range.
